

Fueling the NEXO

- 1. Turn off the NEXO & wait for it to power down.**
- 2. Open the fuel door & dry fuel nozzle with paper towel.**
- 3. Navigate prompts on the pump screen.**
(Shown on reverse side)
- 4. Attach pumps dispenser to the NEXO fuel nozzle.** (Lock on by pulling up on handle.)
- 5. Once connected press the green button to begin fueling.**
- 6. There will be a pumping noise, the dispenser may form some frost, & the screen will cycle some information.**
- 7. Filling can take 5 minutes. The screen will prompt you once the tank is full.**
- 8. Click the release button on the handle, place the dispenser back into its holder, recap the nozzle of the NEXO, and close the fuel door.**

The Hyundai NEXO is a Hydrogen fuel cell vehicle. It generates only electricity and clean water vapour!

The NEXO actually **CLEANS** the air as you drive!

The NEXO's range is over 600km per full tank of Hydrogen.

Hydrogen Fueling Station: 8686 Granville St, Vancouver

Members **MUST** return the NEXO with at least 1/4 tank of hydrogen.

Hydrogen Fuel Pump Screen Instructions

1. When you arrive at the fueling station the screen should look like this.

*Do not attempt to enter fueling PIN by pressing the "Enter PIN #" button.

2. "Press to Hide Message" to access the PIN # input screen.

3. Enter the Nexo fueling PIN # found in your booking notes.

4. "Press for 700 bar Fill" to continue the fueling process.

5. Follow steps on reverse to connect the Nexo to the fuel pump. Then press the large green button on the right of the screen to start fueling.

6. Once fueling is complete a button will appear. "Fill Done Press to Exit"
