

Fueling the Nexo

1. Turn off the Nexo & wait for it to power down.
2. Open the fuel door & dry fuel nozzle with paper towel.
3. Navigate prompts on the pump screen.
(Shown on reverse side)
4. Attach pumps dispenser to the Nexo fuel nozzle. (Lock on by pulling up on handle lever.)
5. Once connected tap "Touch to Start Fueling".
6. There will be pumping noises, the dispenser may form some frost, and the screen will display progress information.
7. Filling can take 5 minutes. The screen will prompt you once the tank is full.
8. Click the release button on the handle, place the dispenser back into its holder, recap the nozzle of the Nexo, and close the fuel door.

The Hyundai Nexo is a Hydrogen fuel cell vehicle. It generates only electricity and clean water vapour!

The Nexo actually **CLEANS** the air as you drive!

The Nexo has a range of over 600km per full tank of Hydrogen.

Hydrogen Fueling
Stations: 8686 Granville
St, Vancouver
